- #1 To be open to more ideas
- #2 Solving problems through brainstorming
- #3 Recognizing problems in my community

100% All students would recommend the program to a friend!

"The Green Works Lab program helped me develop an understanding of what it takes to work and think like an entrepreneur. I also learned about environmental issues including the problems with single-use plastic. I am now paying more attention to my surroundings and there are opportunities to fix problems everywhere I look. This is how you develop a mindset of a future entrepreneur!"

Green Works Lab student, Arely

"I'm glad to have been part of such an amazing experience with a group of smart, talented and kind people. Thank you Green Works!"

Green Works Lab student, Luis
